FDE INTERVIEW PREP #06

FDE INTERVIEW PREP · ISSUE 06 OF 08

Cloud and DevOps questions for FDEs.

AWS, GCP, Azure, Docker, Kubernetes, Terraform, GitHub Actions.

06

Questions and short answers

01 **EKS vs GKE vs AKS?**

Same Kubernetes. Identity, ingress and node scaling differ.

02 **Keys in CI?**

None. OIDC federation from GitHub Actions to each cloud.

03 **Terraform state?**

Remote, locked, and only applied from the pipeline.

04 **Smaller images?**

Multi-stage builds, slim base, non-root user.

Map it on the whiteboard

NEED	AWS	GCP	AZURE
Serverless containers	ECS Fargate	Cloud Run	Container Apps
Private DB access	PrivateLink	PSC	Private endpoint
Secrets	Secrets Manager	Secret Manager	Key Vault
Queue	SQS	Pub/Sub	Service Bus

Kubernetes follow-ups

01 **CrashLoopBackOff?**

Logs of the previous container, events, probes, config.

02 **Safe rollout?**

Readiness probes, PDBs, canary, one-command rollback.

03 **Requests and limits?**

Requests from measured usage, memory limit always.

How to answer

DO

- ✓ Draw the request path
- ✓ Name the identity per hop
- ✓ Explain rollback
- ✓ Mention cost

AVOID

- ✗ Recite service names only
- ✗ Apply from a laptop
- ✗ Ignore networking
- ✗ Assume one cloud

AR

github.com/iarsingh

Practise these

- [x] Map a stack across 3 clouds
- [x] OIDC from Actions to a cloud
- [x] Debug a CrashLoopBackOff
- [x] Terraform module with remote state
- [x] Canary and rollback plan

FDE INTERVIEW PREP #06

KEY TAKEAWAY

Know the patterns. Look up the service names.

→ Map services across clouds by behaviour

→ No static keys in pipelines

→ Always have a rollback

YOUR TURN

Which cloud would you pick for an AI workload, and why?
