FDE SCENARIO DRILLS #07

FDE SCENARIO DRILLS · ISSUE 07 OF 08

The bottleneck nobody asked about.

Scenario: they asked you to automate the 3-minute step.

The mapped workflow

1. Claim arrives
2. Wait for lookup: 40 min
3. Agent reviews: 10 min
4. Draft summary: 3 min
5. Approve and send

> Timed from a week of real cases, not from the process document.

Two options

AS ASKED

- Automate the summary
- Saves about 3 min a case
- Easy to demo
- Wait time unchanged

BOTTLENECK FIRST

- Automate the data lookup
- Saves up to 40 min a case
- Needs another team's API
- Harder, bigger win

How I raise it

01 Show the map

Timings and evidence, no blame on the other team.

02 Offer both

Do the requested step, and scope the bottleneck.

03 Let them choose

Write down the decision and the success metric.

AR

github.com/iarsingh

THE LESSON

Automating the wrong step is fast and useless.

The customer decides, but they should decide with the timings in front of them.

github.com/iarsingh

What interviewers listen for

- [x] Maps the real workflow
- [x] Uses measured timings
- [x] Raises it diplomatically
- [x] Respects the customer's call
- [x] Ties success to a metric

github.com/iarsingh

KEY TAKEAWAY

Map the workflow before you accept the ask.

→ Time the real process

→ Show the trade-off with numbers

→ Let the customer decide, in writing

YOUR TURN

Have you ever been asked to automate the wrong step?
