FDE SCENARIO DRILLS #08

FDE SCENARIO DRILLS · ISSUE 08 OF 08

The demo that met real data.

Scenario: perfect on samples, wrong on their documents.

Diagnose with evidence

01 Build an eval set

50 real questions with answers their experts agree on.

02 Split the failures

Retrieval missed, wrong version, or bad generation.

03 Read the documents

Duplicates, old versions, scanned PDFs, tables.

AR
Akhilesh Ranjan Singh
github.com/iarsingh

What it usually is

FAILURE	FIX
Old versions retrieved	Effective-date metadata + filter
Tables lost in parsing	Layout-aware parser
Exact terms missed	Hybrid search + re-ranking
Confident wrong answers	Cite or decline

AR

Five days

1. Day 1: eval set + baseline
2. Day 2: metadata + filters
3. Day 3: hybrid + re-rank
4. Day 4: re-run evals
5. Day 5: honest readout

THE READOUT

Show the before and after, and what still fails.

Executives trust a measured 82% with known gaps more than a perfect demo.

AR
Akhilesh Ranjan Singh
github.com/iarsingh

What interviewers listen for

- [x] Measures before fixing
- [x] Separates retrieval from generation
- [x] Fixes the data, not only the prompt
- [x] Honest about what remains
- [x] Leaves an eval set behind

FDE SCENARIO DRILLS #08

KEY TAKEAWAY

Demos use samples. Production uses their documents.

→ Build the eval set from real questions

→ Fix retrieval and metadata first

→ Report what still fails

YOUR TURN

What broke first when your demo met real customer data?
