

AKHILESH RANJAN SINGH

+91-8002392976 · akhileshranjan.ks@gmail.com
github.com/iarsingh · linkedin.com/in/iamarsingh · iarsingh.github.io

CORE COMPETENCIES

- DevOps & Platform Engineering
- Cloud Platform Engineering
- Kubernetes & containers
- Infrastructure as Code (Terraform)
- CI/CD, GitOps
- Multi-cloud (GCP, AWS, Azure)
- DevSecOps & cloud security
- SRE & observability
- MLOps / LLMops labs (public GitHub)

IT SKILLS

- **Cloud:** GCP, AWS, Azure
- **IaC:** Terraform, Ansible
- **Security:** IAM, RBAC, OPA, SAST/DAST/SCA, Key Vault, Cloud Armor
- **Languages:** Python, Bash, PowerShell, Go, Java
- **Data:** PostgreSQL, MySQL, MongoDB
- **Platform:** Kubernetes, Docker, Helm, Kustomize, GKE, FluxCD, Argo CD
- **CI/CD:** Azure DevOps, Jenkins, GitHub Actions, GitLab CI, Cloud Build, Harness
- **Observability:** Prometheus, Grafana, ELK, OpenTelemetry

EDUCATION

B.E. Computer Science, RGPV Bhopal, 2019, 8.55 CGPA

CERTIFICATIONS

- Google Professional Cloud DevOps Engineer, 2025
- Google Professional Cloud Network Engineer, 2025
- Google Associate Cloud Engineer, 2024

PERSONAL LABS

PROFILE SUMMARY

Senior DevSecOps, SRE and Platform Engineer with 7+ years designing, automating, securing and operating cloud-native platforms on GCP, AWS and Azure. Strong hands-on work with Kubernetes, Terraform, CI/CD, GitOps, observability and production reliability.

Current role: Senior DevSecOps Engineer at Bupa Capability Centre (Sep 2026–present), Cyber Security Platform / CISO engineering — Azure DevOps with SAST/DAST/SCA, Terraform, Kubernetes/GitOps (FluxCD, Helm, Kustomize), OPA and Azure Key Vault.

Previously DevOps Engineer at Capgemini (Sep 2024–Sep 2026): GCP landing zones, reusable Terraform modules, GKE operations, GitOps and cost/governance. Public evidence: github.com/iarsingh.

WORK EXPERIENCE

Senior DevSecOps Engineer

Bupa Capability Centre · Sep 2026 – Present

- Secure CI/CD on Azure DevOps with SAST, DAST and SCA through the delivery lifecycle.
- Cloud infrastructure with Terraform / IaC; secrets in Azure Key Vault; OPA / policy-as-code.
- Docker, Kubernetes, FluxCD, Helm and Kustomize for cloud-native GitOps delivery.
- Automation with Python, PowerShell and shell across Azure, APIs, monitoring and logging.

DevOps Engineer

Capgemini, Noida · Sep 2024 – Sep 2026

- Designed and governed enterprise GCP landing zones (Shared VPC, project hierarchy, IAM, policy-as-code).
- Standardized reusable Terraform Enterprise modules for networking, IAM, GKE, monitoring and security, reducing provisioning effort by about 70%.
- Integrated Terraform Enterprise with Git CI/CD, Harness, Jira and ServiceNow for self-service change.
- Operated production GKE (node pools, upgrades, autoscaling, RBAC) and SRE practices (monitoring, incident response, RCA).
- Cut cloud spend about 20% via rightsizing, autoscaling and governance; Cloud Armor, OpenTelemetry, IONIX and Stream Security.

Senior Software Engineer – DevOps

Tech Mahindra, Mumbai · Jul 2022 – Sep 2024

- Enterprise CI/CD with Jenkins, GitHub Actions, Terraform, Docker, Kubernetes, Helm and Ansible.
- IaC across GCP, AWS and Azure; Kubernetes platforms with 99.9% availability through monitoring.
- DevSecOps, backup/DR (Veeam, Kasten K10), Prometheus, Grafana and ELK.

System Engineer – Cloud & DevOps

TCS, Bengaluru · Sep 2019 – Jul 2022

- Production Kubernetes and GKE; CI/CD with Jenkins, Cloud Build and Terraform (about 40% less deployment effort).

Public GitHub labs, not live customer or employer deployments.

- terraform-gcp-platform
- customer-deployment-platform
- Farmers Buddy

- GCP provisioning, IAM, Linux operations, monitoring, incident management and RCA.
