

Yes. Since you're a working DevOps engineer, you need a **structured learning path**, not random YouTube hopping.

For your target (**AI Infra / MLOps / LLMOps / Agentic AI**), here's the best combination of:

-  Udemy
-  Pluralsight
-  Educators
-  Platforms
-  Learning order

that can realistically take you toward high-paying roles.

BEST COMPLETE ROADMAP STACK

PRIMARY PLATFORM (HIGHLY RECOMMENDED)

KodeKloud^[OBJ]

This should become your MAIN platform for:

- Linux
- Docker
- Kubernetes
- Terraform
- CI/CD
- DevOps
- Cloud

Why?

Because it's:

-  hands-on
-  labs included
-  production-oriented
-  excellent for working professionals

FOLLOW THIS ORDER ON KodeKloud

Phase 1

1. Linux Fundamentals
2. Docker for Beginners
3. Kubernetes for Beginners
4. Git
5. GitHub Actions/Jenkins
6. Terraform Basics

Phase 2

7. Advanced Kubernetes
8. Helm
9. Monitoring
10. DevSecOps

FOR AI + LLMOPS

DeepLearning.AI^[OBJ]

THIS is one of the best for modern AI workflows.

COURSES TO FOLLOW

MUST DO

1. Generative AI for Everyone

Good overview.

2. LangChain for LLM Application Development

VERY IMPORTANT.

3. Building Systems with ChatGPT

Excellent practical course.

4. AI Agents in LangGraph

Directly aligned with your roadmap.

5. Vector Databases

Important for RAG.

BEST UDEMY COURSES

Kubernetes

Mumshad Mannambeth (BEST)

Kubernetes for Beginners by Mumshad

He's also founder of KodeKloud.

Docker

Bret Fisher Docker Course

Docker Mastery by Bret Fisher

Excellent production perspective.

Terraform

More Than Certified in Terraform

Terraform Course

Python Backend

FastAPI

Eric Roby or FastAPI Bootcamp

(Search on Udemy)

OR better:
official docs + projects.

MLOps

Best Practical One

MLOps Zoomcamp

FREE and extremely valuable.

MLOps Zoomcamp

This is VERY important for your target.

LLMOPS + AGENTS

BEST EDUCATORS

1. Andrej Karpathy

For deep understanding.

Andrej Karpathy YouTube

2. Hussein Nasser

For backend/networking/systems.

Hussein Nasser YouTube

3. AI Jason

For:

- agents
- RAG
- production AI systems

AI Jason YouTube

4. NetworkChuck

For infra/devops motivation + basics.

NetworkChuck YouTube

PLURALSIGHT (ONLY FOR SOME AREAS)

Pluralsight is excellent for:

- system design
- architecture
- cloud fundamentals

But:

 weak for latest AI agent ecosystem

Use it ONLY for:

- AWS
 - Azure
 - architecture
 - networking
-

BEST APP-STYLE LEARNING

Frontend + Backend Practice

Frontend Masters^[OBJ]

Even though frontend-focused, it has AMAZING:

- backend

- TypeScript
 - architecture
 - full-stack
 - AI app engineering
-

BEST FOR SYSTEM DESIGN

ByteByteGo^[OBJ]

For:

- distributed systems
- scaling
- architecture

VERY valuable for 30+ LPA roles.

BEST REAL-WORLD ENGINEERING PLATFORM

Roadmap.sh^[OBJ]

Follow these roadmaps:

- DevOps
- Backend
- AI Engineer
- MLOps

This is VERY useful to track progress.

YOUR IDEAL LEARNING COMBINATION

DAILY STACK

Main Learning

✓ KodeKloud

AI Learning

✓ DeepLearning.AI

Practical AI

✓ AI Jason + projects

Systems Understanding

✓ Hussein Nasser

Architecture

✓ ByteByteGo

IMPORTANT

DO NOT:

✗ buy 20 courses

Instead:

✓ finish few deeply

✓ build projects alongside

THE CORRECT LEARNING METHOD

Every Topic Must Follow This Formula

Step 1

Learn basics (1–2 hrs)

Step 2

Build mini project

Step 3

Deploy it

Step 4

Monitor it

Step 5

Document on GitHub

THIS is what creates high-paying engineers.

MOST IMPORTANT PLATFORM FOR YOU

If I had to pick ONLY 3:

1.

KodeKloud^[OBJ]

(for DevOps + Kubernetes)

2.

DeepLearning.AI^[OBJ]

(for AI + LLMOps)

3.

MLOps Zoomcamp^[OBJ]

(for real MLOps engineering)

That combination is incredibly strong for your goal.
